

DESCRIPTION

The CineGrey 5D® is an angular reflective front projection material designed to reject ambient light while maintaining superb picture quality. The CineGrey 5D® is the perfect solution for rooms that have little or no control over incidental light. In addition, the CineGrey 5D® increases projector brightness 1.5 times the amount. This is perfect for low lumens output projectors!

FEATURED SERIES: Aeon CineGrey 5D®, Starling Tab-Tension CineGrey 5D®, Tripod Tab-Tension CineGrey 5D®

MATERIAL SPECIFICATIONS

- 1.5 Gain screen material with 80° (L&R 40°) Viewing angle
- ISF Certified for accurate color reproduction; GreenGuard Certified
- High fidelity gray surface produces superb clarity and sharp images
- Mildew Resistant; Screen surface can be cleaned with a microfiber cloth
- Angular Reflective CLR®/ALR Front Projection Material for Standard “Long” Throw Projectors
- Active 3D, 4K Ultra HD, and HDR Ready

Color: Grey

Horizontal Viewing Angle: 80°

Projection Type: Front

Flame Retardant: Complies with NFPA 701

On-Axis Peak Gain: 1.5

Minimum Lens Throw Ratio: 1.5

GAIN CHART

On axis 0° Gain: 1.5
Viewing Cone: 80°
