

Acoustically Transparent Screen Material Comparison

Screen Material Name	AcousticPro1080P3	AcousticPro UHD
Picture		
Description	<p>The AcousticPro1080P3 is the ultimate acoustically sound transparent front projection material. The tight angular weave eliminates the moire effect while presenting warm neutral colors. The AcousticPro1080P3 allows speaker placement behind while allowing an exceptional acoustically transparent performance.</p>	<p>The AcousticPro UHD is a moiré-free acoustically transparent front projection screen material. The dense synthetic weave is compatible with Ultra-High Definition/4K resolutions. The AcousticPro UHD design maximizes sound penetration with minimal attenuation without compromising picture quality.</p>
Available in Screen Series	ezFrame, Sable Frame, Lunette	Aeon, Spectrum, Saker Tab-Tension, Evanesce, VMAX Dual
Type of material	Polyester (white) - weave	Polyester/PVC (off-white) - sheer weave
Projection Type	Front	Front
Ambient Light Rejecting	No	No
Gain	1.1	1.0
Viewing Angle	180°	180°
Black backing	Black scrim included	Black scrim included on Aeon only
3D Ready	Active 3D	
Minimum Throw Ratio	0.8 x image width	0.8 x image width
Ultra/Short-throw projector compatible	Yes	Yes
Acoustic Transparency (Mean attenuation)	- 3.09 dB	- 2.36 dB
Best for environments	In-wall speaker or behind speaker placement for 1080P and 4K projectors in a controlled room environment.	In-wall speaker or behind speaker placement for 1080P and 4K projectors in a controlled room environment.
GREENGUARD Certified	No	No
Flame Retardant	Yes, Complies with NFPA 701	Yes, Complies with NFPA 701
