

## Rear Projection Material Comparison

Screen Material Name	Wraith Veil	Wraith Veil 2	Wraith Veil Dual
<b>Product Picture</b>			
<b>Description</b>	WraithVeil is our rear projection screen material. It has a high gain performance for applications with high levels of ambient light. Its special surface coating enhances color reproduction with wide diffusion uniformity.	WraithVeil 2 is a self-adhesive optical rear projection film designed for installations on clear glass/plexiglass panels for the purpose of converting them into rear projection screens.	The WraithVeil Dual is a front/rear projection material designed to accommodate both projection methods. This 2-in-1 material eliminates the need to swap out the viewing surface which makes this a very versatile product.
<b>Available in Screen Series</b>	ezFrame, QuickStand, QuickStand Drape, CineTension 2	Insta-RP 2	Yard Master 2 Dual
