

EliteProAV's **Manual Grande® Series** is a Large-sized manually operated retractable screen that uses a bead chain clutch system. It employs a very swift rolling mechanism that allows it to stop at any point to prevent from being raised or lowered too far.

The housing is of aluminum construction, is moisture resistant and available in a white finish. It is great for large room presentations for use in classrooms, training facilities, lecture halls, and a variety of business applications.

The MaxWhite® 1.1 Gain Front Projection material is black-backed to eliminate light penetration for enhanced brightness. It also has black masking borders on all sides to mitigate projector overshoot while enhancing perceived visual contrast.

Screen Material

- MaxWhite® 1.1 gain (matte white) front projection material
- Wide diffusion uniformity allows viewers to see the picture from any angle
- 4K/8K Ultra HD, Active 3D, and HDR Ready
- Black borders absorb projector over scan while enhancing visual contrast
- Black backed screen material eliminates light penetration for superior color reproduction
- Not compatible with Ultra/Short-throw Projectors
- Available in the following diagonal sizes:
 - 180" in 4:3 format
 - 180" in 16:9 format

Design and Installation

- Flush wall installation design with low-profile sliding brackets
- Aluminum moisture resistant arcuate housing in a white finish
- Bead chain clutch system allows screen to roll up/down and stop at any point
- Up and down stops prevent screen from rolling
- Nylon bead chain is durable for daily use
- Cord retainer included for securing bead chain loop

Quality & Reliability

- GREENGUARD® and GREENGUARD® Gold Certified (UL 2818) for safe indoor emissions
- 5-year manufacturer's warranty
