

The versatile combination of whiteboard and projection screen features and improved thin-edge design with accessories tray: This is the ideal presentation tool for your training facility. It is a leading edge combination of two essential classroom visual aids.

The **WhiteBoardScreen™ Thin Edge** functions as a theater-grade projection material with a full lambertian diffuser that is also a dry-erase writing surface. It outperforms conventional whiteboards by providing superb color temperature without the glare for a clear and more effective presentation.

The **WhiteBoardScreen™ Thin Edge** is bordered with an ultra-thin aluminum black frame that protects the edges while enhancing perceived visual contrast. As with traditional whiteboard designs, it also features a magnetic surface to allow attachments to the screen's surface.

Screen Material

- VersaWhite 1.1 Gain projection surface is coated with a transparent nanotech dry-erase layer
- Provides true color reproduction and contrast enhancement over conventional whiteboard
- Active 3D, 4K/8K Ultra HD, and HDR Ready
- Wide diffusion uniformity allows viewers to see a bright clear picture from any angle
