

# Aeon CineGrey 3D® Series

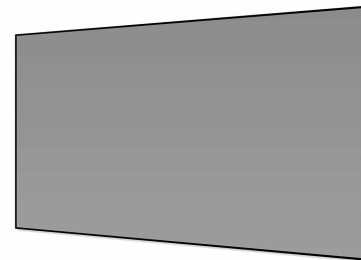

Ambient Light Rejecting EDGE FREE® Projection Screen

Compatible with Standard “Long” Throw Projectors ONLY

## Product Description

The **CineGrey 3D®** is a reference quality front projection screen material formulated for environments with minimal control over room lighting. It was designed to enhance picture brightness, offer accurate color fidelity, and improve contrast levels. The CineGrey 3D® is best for family rooms, educational facilities, conference rooms or any applications in which incident light is a factor. Typical matte white surfaces wash out the images when ambient light cannot be controlled. The CineGrey 3D® is the best choice for having a projected image with a balanced color temperature and contrast under such conditions.

Models	Diagonal	Aspect Ratio	View Width	View Height	Material	Gain	Frame Width	Frame Thickness
AR100DHD3	100"	16:9	87.3 in	49.2 in	CineGrey 3D®	1.2	0.4 in	1.0 in
AR110DHD3	110"	16:9	95.9 in	53.9 in	CineGrey 3D®	1.2	0.5 in	1.0 in

## Product Features

- ISF Certified for accurate color reproduction
- 90 degree viewing angle with 1.2 Gain
- Angular-reflective front projection material with ambient light rejecting technology
- Contrast enhancement over standard matte white surface
- 4K Ultra HD, Active 3D, and HDR ready
- Polarized for Passive 3D applications
- Available in the following diagonal sizes:
  - 92", 100", 110", 120", 135" and 150" in 16:9 format
  - 125", 138" and 158" in 2.35:1 (Wide) format
- Capable of improving brightness, color, and contrast under ambient light conditions
- Aluminum lightweight split-frame design
- Material stretches over frame for a permanently tensioned flat surface
- Smaller footprint maximizes viewing area
- EDGE FREE® or install ultra-thin trim
- Wall mount brackets slide ensuring the frame is properly centered
- Optional LED backlight kit with remote control - **Sold separately**
- 2-Year / 3-Year ENR-G Manufacturer's Warranty by Elite Screens, an ISO9001 manufacturer since 2004
