Aeon CineWhite® A4K Series

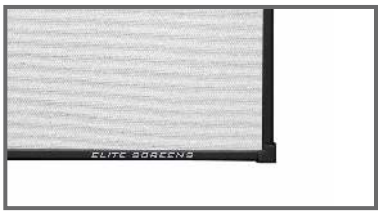

Acoustic Transparent Fixed-Frame Projection Screen

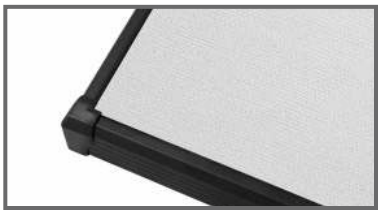

Product Description

The ***Aeon CineWhite® A4K*** is an EDGE FREE® fixed frame screen with an ultra-fine acoustically transparent front projection material for high-resolution projectors. CineWhite® A4K produces exceptional color neutrality, color reproduction, and wide diffusion uniformity for superior performance in dark room environments. Designed to preserve both image and audio fidelity, allowing sound to pass through with minimal attenuation, ensuring excellent sonic transparency without compromising picture quality.

Product Design & Features

- Sound transparent projection material allows speaker placement behind the screen
- ISF Certified for accurate color reproduction
- Delivers outstanding acoustic transparency, preserving natural sound reproduction with minimal attenuation
- Wide viewing angle provides clear/bright picture from any position
- Black backing scrim reduces light penetration
- Lightweight aluminum split-frame design
- Sleek EDGE FREE® design maximizes viewing area
- Ultra-thin Edge trim included for enhanced appearance
