

Product Description

Take your golf game anywhere with the **GolfSim® Portable Series**. This complete golf enclosure features a lightweight, folding aluminum frame perfect for home or on-the-go simulator setups. The impact-resistant screen handles ball speeds up to *200 mph and delivers a realistic bounce-back experience. Made from tightly woven polyester and ISF-certified for accurate color reproduction, it's great for golf, multi-sport use, or even movie nights.

Product Design & Features

- Engineered to resist impact/withstand ball speeds up to *200 mph
- Material construction reduces golf ball rebound for safe play
- Meets high industry standards for professional projection performance
- Lightweight aluminum folding-frame design quickly assembles in minutes
- Includes top, left/right enclosure cover panels and side triangular net extensions.
- Velcro and ball bungees provide a flat and taut projection surface
- Traveler-friendly carrying bag included stores entire product
