

# ImpactWhite® 250 Material

Tightly Weaved Golf Impact Projection Material

## DESCRIPTION

The *ImpactWhite® 250* combines impact-resistant durability with high-definition projection clarity. A precision tight weave keeps the surface smooth for sharp, vibrant visuals, while its rugged construction handles golf ball strikes with ease. It's an ideal choice for golf simulators and multi-sport training setups.

Shown here on GolfSim Electric Series

## MATERIAL SPECIFICATIONS

- ImpactWhite® 250 golf impact front projection screen material.
- 0.75 gain with a 170° wide viewing angle allows viewers to see a clear bright uniform picture from any angle.
- Withstands ball speeds up to 155 mph
- Tightly woven polyester minimizes noise and reduces bounce-back
- Delivers crisp, sharp visuals with no loss of image fidelity
- ISF Certified for accurate color reproduction
- Designed and engineered to perform to high-level industry standards for cinema quality presentations.
