

### Product Description

The **Light-On CLR® 5** is a portable projection screen engineered to perform and provide the best picture quality in bright indoor environments. Its folding-frame design sets up quickly and delivers a stable, professional display surface for training sessions, classroom instruction, and on-the-go presentations. The StarBright CLR® 5 (SBCLR® 5) material is a specialized Ceiling Light Rejecting surface optimized for bottom-mounted ultra-short throw projectors.

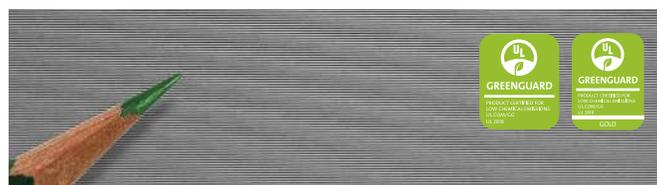

### Product Design & Features

- Ceiling Light Rejecting material absorbs 80% of overhead light
- Reflective and absorbent layers optimize projector performance in ambient light room environments
- Screen material stretches across an integrated tube roller and locks onto the frame's brackets to maintain a flat surface
- Top/bottom magnetic strips help keep the screen perfectly flat and create a clean, defined projection border
- Collapsible folding frame design with height adjustable AT legs
- Protective carry bag holds the entire product for easy transport, storage, and protection
- Drape Kit included for a professional presentation
