

The **Starling Tab-Tension CLR® 3 Series** is an electric retractable ultra-short throw front projection screen with Ceiling Light Rejection® technology. Its tab-tension design assures a flat and taut projection surface that produces exceptional images that are ripple-free. The CLR® 3 absorbs overhead light to prevent the washout effect commonly experienced with conventional matte white materials. This allows projector presentations to have contrast-rich images.

## Screen Material

- CLR®3 Ceiling Light Rejecting projection material absorbs up to 90% of overhead light
- Crafted for use with Ultra-short Throw (UST) tabletop/bottom mounted projectors ONLY
- Lenticular sawtooth micro-structure filters out ambient light for superior image brightness and contrast
- Dedicated reflective and absorbent layers maximize projector performance in ambient light room environments
- Wide diffusion uniformity allows viewers to see a clear bright picture from any angle
- Improves black levels in bright and dark room environments
- Reflective layer concentrates projected light back to viewer's field of vision and negates light scatter
- Black backing eliminates light penetration to avoid picture degradation
- Available in the following diagonal sizes: 101" and 121" in 16:9 aspect ratio

## Design & Operation

- Flush wall/ceiling mounts permit wood stud installation and allow screen to slide horizontally for proper centering
- Tab-tension design helps maintain a flat, taut, and ripple-free projection surface
- Curved aluminum enamel white case is moisture resistant
- Internal Radio Frequency/Infrared receivers with IR, RF remotes included
- Detachable 3-way wall switch keypad for UP/STOP/DOWN manual operation
- Wireless 5-12 volt trigger included for synchronized screen operation with projector
- 2-Year / 3-Year ENR-G Manufacturer's Warranty by Elite Screens, an ISO9001 manufacturer since 2004
