

The **Tripod B Series** is a light-weight portable projection screen of the traditional tripod design. It is a dependable design that is easy to carry for portable small or large venue presentations. Its adjustable telescopic support allows variable height settings to aid in formatting the screen into a variety of aspect ratios. The MaxWhite® 2 front projection material has a 1.1 unity gain with a wide viewing angle.

Screen Material

- MaxWhite® 2 - 1.1 Gain matte white front projection material
- Black backing eliminates light penetration for enhanced brightness
- Wide 180° viewing angle diffusion uniformity maintains projector light all across the surface
- Not compatible with Ultra/Short-throw Projectors
- Standard left and right black masking borders enhances perceived contrast
- Available in diagonal sizes 50", 71", 85" and 113" in 1:1 format
