

The **Tripod Pro** features a new casing with the velour surfacing that adds a touch of elegance for more upscale small or large venue presentations. Its black tube casing will protect the screen material and is coated in a velveteen material that absorbs glare from projectors. It is available in a (1:1) aspect ratio with viewing sizes from 113" and 119" diagonal measurements. The screen material is Elite's **MaxWhite®** 1.1 gain matte white front projection material with black masking borders. They vary in weight from 15 lbs to 35 lbs making the tripod a highly portable and versatile product. Lastly, each tripod has a keystone eliminator to accommodate angle distortion or "keystone effect" during forum presentations.

Features

Screen Material
