

GolfSim DIY Screen Series

ImpactWhiteTM 1145 Golf Simulation Front Projection Screen Material

User's Guide – M Type

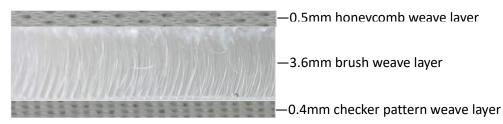

Product Description: The *GolfSim DIY Screen Series* is a Do-it-Yourself impact golf screen that utilizes our three-layer ImpactWhite[™] 1145. It includes grommet holes to allow for installation on custom frames for golf enclosures. It can also be used for a variety of Sports Simulation applications.

Installation Tips and Precautions

- 1. Handle with caution, material is subject to static electricity.
- 2. Wear gloves and unroll the material on a clean surface.
- 3. Make sure to use the correct side. The ImpacWhite™ 1145 screen has a front and back side.
- 4. Folding lines/wrinkles are normal due to the nature of the material structure and packaging.
- 5. Avoid installing/hanging the screen where the ball can strike the grommets directly to prevent damaging the edges.
- 6. Make sure to allow proper distance for swing range to protect children, pets, ceilings, walls, windows, or any other property.

Material Features/Specs

- Composed of 100% polyester Non-absorbent material that is hard to mold
- Warp knitted fabric with 11.5 c.p.c. (course per cm) High strength, difficult to break
- ➤ Withstands golf shots up to 200 mph
- ➤ 4.5mm thick 3-layer knitted structure provides excellent shock absorption
- > The internal space suppresses the noise generated when the golf ball impacts the screen

Maintenance

- Use a dry microfiber cloth to remove dust from the screen surface.
- When cleaning, use a microfiber cloth dampened with warm water to remove any traces.
- Use hot steam to wet the material, then wipe dry with clean microfiber.
- Do NOT rub or apply pressure when cleaning the surface.
- Do NOT use any solutions, chemicals, or abrasive cleaners onto the screen surface.

To avoid damage to the screen, please avoid touching the screen directly with your fingers, pens/pencils or any other sharp or abrasive objects.
