

The **VMAX Dual Series** is a dual aspect ratio electric projection screen that offers alternating HDTV (16:9) and Widescreen (2.35:1) for today's home cinema projectors.

The **VMAX Dual** offers a professional grade surface to match the abilities of anamorphic projectors. Anamorphic is the ability for a projector to switch from one aspect ratio (screen shape) to another in accordance with the type of presentation being shown.

#### Screen Material

- CineWhite® 1.1 Gain front projection surface
- Wide viewing angle with excellent diffusion uniformity
- Standard black backing eliminates light penetration
- 4-sided black masking borders
- Active 3D and 4K Ultra HD Ready

#### Design and Installation

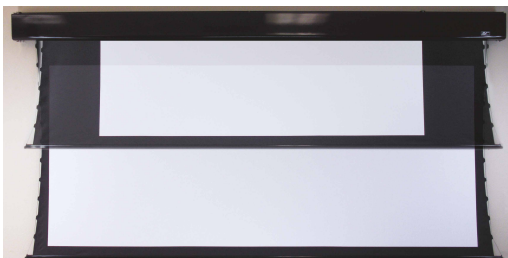

- Black aluminum housing with enamel coating is moisture resistant
- Floating brackets for wall mounting permit sliding for wood stud installation and proper alignment
- 15 mm distance between screen materials negates depth of focus distortion
- Alternating 16:9 (HDTV) and 2.35:1 (Cinemascope) projection materials
- Constant Image Height
- Optional in-ceiling trim kit available for concealed installation

#### Control System

- Infrared and Radio Frequency wireless remote control operation with separate 16:9 and 2.35:1 buttons
- Detachable 3-way wall switch for wired control and extended IR sensor

#### Quality and Reliability

- Dual tubular motors for each screen panel provides superior timing, smooth operation and low power consumption
- 2-year standard warranty 3-year warranty offered through our ENR-G program (Education, Non-Profit, Religious, and Government organizations) Non-Profit, Religious, and Government organizations)
- GREENGUARD® Gold Certified

16:9 and 2.35:1 Dual Screens in one screen
