

*Screen not included, used for illustration purposes only

The Yard Master 2 is a folding-frame outdoor projector screen that uses a light-weight folding aluminum framework. It is ideal for outdoor presentations but sometimes, the event requires a higher screen setting so that everyone present can easily see the big picture. The Yard Master 2 now has an add-on feature. These high-quality **extended legs** perfectly match the Yard Master 2's design adding more than 27 inches of extra height. This provides a significant height advantage allowing your presentation to be seen in large group presentations at a greater distance.

Design & Installation

- Light-weight aluminum square tube construction
- Detachable and foldable AT-legs design
- Only compatible with Yard Master 2 and Yard Master 2 WraithVeil® Dual models
 - ZOMS2-LEGS-Z (90" to 135" Models)
- Simply swap-out existing T-legs and replace with Extension Legs
- Assembles in minutes with no tools required
- Increase the Yard Master 2's screen height by 27"
- AT-Legs provide additional support and stability
- Ideal for applications that require a higher bottom viewing area

Leg Extension Comparison

Part Number	Leg Length Opened	Leg Length Closed	Leg Width Opened	Leg Width Closed
ZOMS2-LEGS-Z	53.1	32.2	37.1	3.7
Standard T-legs	25.9	25.7	37.2	3.9

Unit: inch
